

Chemeketa Community College Course Material Fee Pilot Program

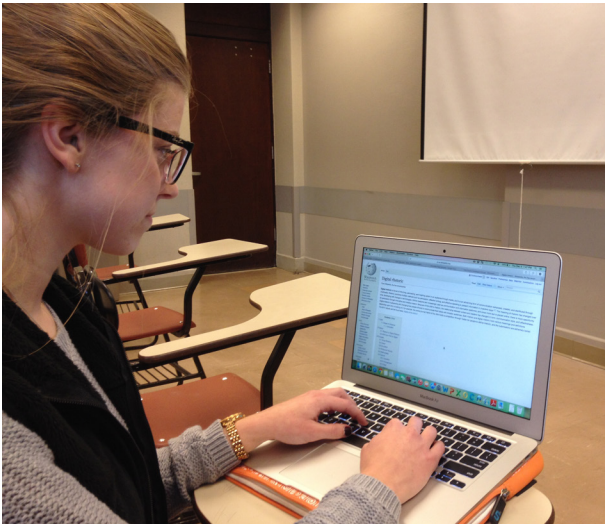

What is the Course Materials Fee Based Pilot Program?

Chemeketa Bookstores' Course Materials Fee Based Access Program has been used successfully at college book stores across the country. This model provides instant access to course materials with totally interactive and adaptive digital content at drastically reduced prices to students.

How Does It Work?

- The digital course material is included in your class fees
- An email is sent to the students' my.chemeketa e-mail account a day before class begins
- The email includes instructions on accessing the digital content for the course
- The instructor provides access to digital content to students by the first day of class through Blackboard
- Students can choose to opt out by emailing the bookstore before the two-week deadline
- Instructions are e-mailed by the Bookstore to explain the opt out process
- Once a student opts out of the course materials, all access is turned off and is no longer available to the student

Our Student Success Goals?

- Reduce the cost of course materials
- Improve educational outcomes
- Expand and expedite access to course materials
