

Chemeketa Community College Digital Course Material Fee Program

WHAT IS A DIGITAL COURSE MATERIALS FEE?

Digital course materials are delivered to your e-learn course page on day one and charged on your student account. This way you get the content your instructor selected at drastically reduced prices. Often the digital materials include interactive learning tools, but sometimes the digital course material will be a standalone eBook with helpful study tools.

HOW DOES IT WORK?

- The digital course materials costs are included in your class fees and appear on your bill as “Digital Course Materials Fee”
- You will receive an email at your my.chemeketa email account explaining how to access the materials
- Look for a link to the online materials in eLearn
- If you drop the class during the add/drop period, no need to do a thing, you will automatically be refunded
- If for some reason you do not wish to obtain your course materials in this manner, you may choose not to. This option is referred to as “**opt-out.**”
- You can choose to opt out via a link in eLearn
- If you opt out of accessing your course materials in this way, the fee will be refunded on your student account after the add/drop date. For the first week, you can opt out and opt back in as many times as you want while maintaining access. However, if the digital material is a standalone eBook, you will immediately lose access upon opting out, and would have to opt back in to regain access before the add/drop deadline.

WHAT IF YOU REALLY WANT TO HAVE A PRINTED BOOK IN ADDITION TO THE eBook?

The bookstore sells printed upgrades for most of these courses, or there may be a link included with your digital course materials to purchase a print copy directly from the publisher. Bookstore prices range from \$20-\$33 depending on the course. These printed materials are only for students who do not opt out. You'll need the digital access to complete your assignments.

ANY QUESTIONS?

Your Chemeketa Bookstore is here to help you if you have any questions, concerns, or if you just want to let us know your thoughts about this new way of obtaining course materials.
